

FINAL AWARD NOMINEE RANKING SHEET

This form is a tool for the judge advisor to record the ranked candidates for each award. The blank columns indicate any additional awards given at the event. A team can appear in multiple award categories. The All-Around Champion candidates are developed by considering competition notebook scores, team interview scores, and on-field performance rankings. If more rankings are needed beyond the five fields provided below, or if there are additional awards being judged, a second sheet should be used.

It is important to have multiple ranked candidates for each award. The selection of the All-Around Champion winner may cause other award winners to change, as each team can earn only one judged award at an event.
